

Wilmar Edible Oils B.V. is the Dutch branch of Wilmar International Limited. Wilmar is Asia's leading agribusiness group and is the largest processor and merchandiser of palm and lauric oils. Wilmar Edible Oils B.V. became the first venture in Europe, located at the heart of the Port of Rotterdam. The first refinery of Wilmar in Rotterdam commenced operation in 2005 and the second in 2009. Besides the plant in Rotterdam we have also refineries in Germany and the Ukraine. The trade and commercial activities for Europe are handled in Barendrecht. Quality, service and reliability are the cornerstones to Wilmar's reputation as an international processor and trader in the edible oils industry.

Wilmar is expanding and investing in Europe. We look forward to being more involved in the local chemical community and strengthening our foothold in Europe, including for bio-based chemicals. Therefore we will build a new and state-of-the-art natural alcohol plant in Rozenburg (near Rotterdam, The Netherlands). The facility is scheduled to come on stream by 2013.

For our location Vondelingenplaat and our new to build plant we are currently looking for an energetic and vigorous

Safety & Health Officer

You will have the responsibility to improve workplace safety, process safety and fire safety and make sure that our plants run in compliance with all respective laws, regulations and different standards of which OHSAS 18001 is the main. At the beginning of your engagement you will be a member of the project team for the build of the new plant. You are involved in Quality (ISO9001), Food Safety (HACCP, GMP+) and Environmental (ISO 14001). Furthermore you will support the management in topics of accident prevention, occupational health care, process safety and environmental issues.

Tasks:

- Follow relevant laws and regulations, track and inform on changes
- Make sure that relevant laws and regulations are implemented within Wilmar
- Make sure that Wilmar keeps the OHSAS certificate
- Conduct audits including reporting and follow up
- Coordinate and supervise safety on construction areas
- Participate in permits process and investment projects to check safety requirements
- Conduct accident and incident investigations, RI&E, process safety reviews and risk assessments including reporting and evaluation
- Training of employees
- Monitor safety regulations, rules and permits
- Develop site specific instructions and procedures, emergency plans and explosion safety documents
- First contact to relevant authorities

Requirements:

- Bachelor/Masters degree in Process Technology or Mechanical Engineering and a degree in higher safety management
- Experience as a field engineer or safety engineer in the chemical industry
- Experience as Safety Officer in large construction sites and with cost and budget management
- Be able to implement work instructions and procedures in an ISO 9001 environment

- Knowledge of OHSAS 18001 and preferably other ISO standards
- Knowledge of Autocad
- Excellent knowledge of the Dutch and English language. Knowledge of the German language is an advantage.
- Able to work with tight deadlines
- Teamworker, flexible and hands-on mentality
- Excellent communication skills in the Dutch and English language

We offer you:

A dynamic and a Rotterdam based job within an inspiring young team with the opportunity to bring up and execute your ideas. Taking responsibilities and personal development are self-evident within our company. Wilmar offers good salary and benefits package.

If you are interested in this vacancy and working for our company, please send your curriculum vitae in the English language to Mrs Manon Otte (hr@wilmareurope.nl).
